2021 - 2023

HYPERION DEV

Fullstack Web Development Bootcamp
2024 - 2025

UNIVERSITY OF APPLIED SCIENCES

Bachelor of Computer Sciences
2024 - 2028

WORKING EXPERIENCE

MEDIAMETRICS (SMOLLAN)

Retail Software Company | 2024 - 2025

As an intern at Mediametrics, a retail management solution owned by the Smollan Group, I was entrusted with a diverse set of responsibilities across development and data management. I designed and built a fully functional mock-up company website, M2, using React and Next.js, replicating the provided design 1:1 with custom CSS. Alongside development, I managed data workflows by creating advanced Excel spreadsheets with cross-workbook functionality, pivot tables, and macro formulas. My role also involved managing databases and facilitating in-store data capture. Mediametrics' clients include some of Africa's largest retail brands and banks, such as **Pick n Pay**, **Tiger Brands**, and **Standard Bank**.

TEDDY BEAR FOUNDATION

Digital Marketing Officer | 2024 - 2025

At The Teddy Bear Foundation, a nationwide non-profit supporting abused children across South Africa, I oversaw the marketing department and drove several digital initiatives. I designed a giveaway sign-up page and implemented a large-scale digital marketing campaign by partnering with leading lifestyle brands to sponsor the prize pool. To support this, I built a user-friendly mobile and desktop web app using React (Vite), custom CSS, and PayFast API integration, enabling seamless donations and real-time analytics tracking for the campaign. Beyond development, I created detailed board reports, launched digital fundraising strategies, and streamlined productivity by integrating Monday.com and optimising Google Workspace. I also managed brand consistency across digital and physical channels, collaborating with designers and creatives to align communications with our audience.

APPOINTMENT ENGINE

Frontend Developer | 2025

I am currently working long-term on Appointment Engine, a cloud-based booking and business management platform, where I lead the frontend development of both the web platform and mobile app using React. The system integrates a wide range of SDKs, APIs, and multi-channel tools to deliver a seamless, responsive experience with real-time data synchronisation.
